RESEARCH SERVICES

Our Key Differentiators

Client Satisfaction Scheme

KAnalysis at all times promises to provide support and updates even after project completion and closure, in pursuit of meeting clients' end requirements exceeding desired satisfaction level without any additional charges

Please allow us to prepare a detailed custom proposal for you or your clients which can be considered for review before taking any decision, without incurring any cost.

Technical Competencies

We are a "BIG-SMALL" firm based in New Delhi, India. BIG with respect to average experience of our consultants (min 6 year) & SMALL, because we are limited in number (a team of 25 analyst). This Handpicked team serves clients of various domain from Nuclear Science to Bottle Cover Twister. Specialized STN search expertise is an EDGE for us in chemical/pharmaceutical domains.

Client Satisfaction

As a part of Service industry, we know the value of client satisfaction. Since our inception in 2007 from a boot strap (with ZERO funding), we have developed a regular client base of more than 55 law firms, SMEs and MNCs. These number themselves prove our dedication towards providing nothing less than BEST.

Life Sciences and Chemical

Our enhanced competence and experience in these domains is considered to be second to none in the Indian patent research market.

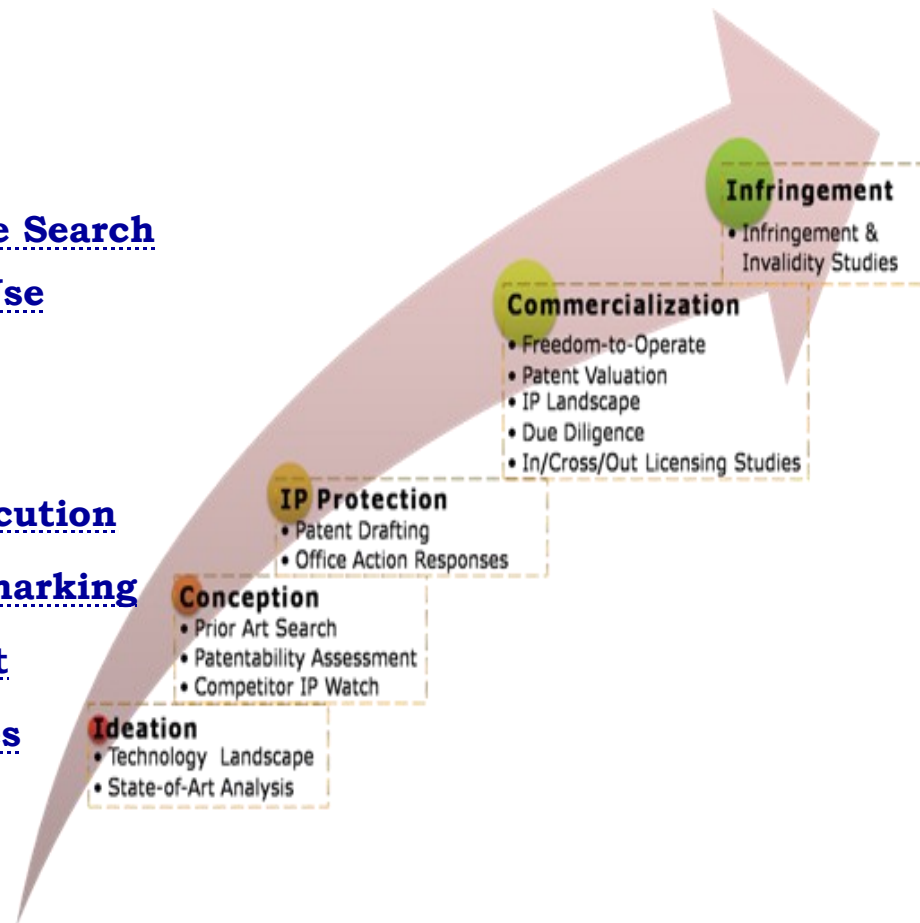

Multilingual Capabilities

Most comprehensive in-house language capability to assist research in majority of non-English documents such as Chinese, Korean, Japanese etc.

An experienced team of self motivated professionals with diverse technical backgrounds and exposure to a myriad of industry verticals are obsessively committed to consistently deliver excellence in every aspect through the entire technology life cycle

WHAT WE DO

- ◇ Prior Art Search
- ◇ Patent Drafting Support
- ◇ Chemical Structure/Sequence Search
- ◇ Claim Mapping/Evidence of Use
- ◇ Freedom to Operate Search
- ◇ Patent Invalidation Search
- ◇ Patent/PCT Filing and Prosecution
- ◇ Validity and Strength Benchmarking
- ◇ IP Asset Management Support
- ◇ Technology Landscape Studies
- ◇ Licensing Support Studies
- ◇ Competitive Intelligence

We firmly believe in clear understanding of client's end requirement for ensuring a quality and matching the desired satisfaction level

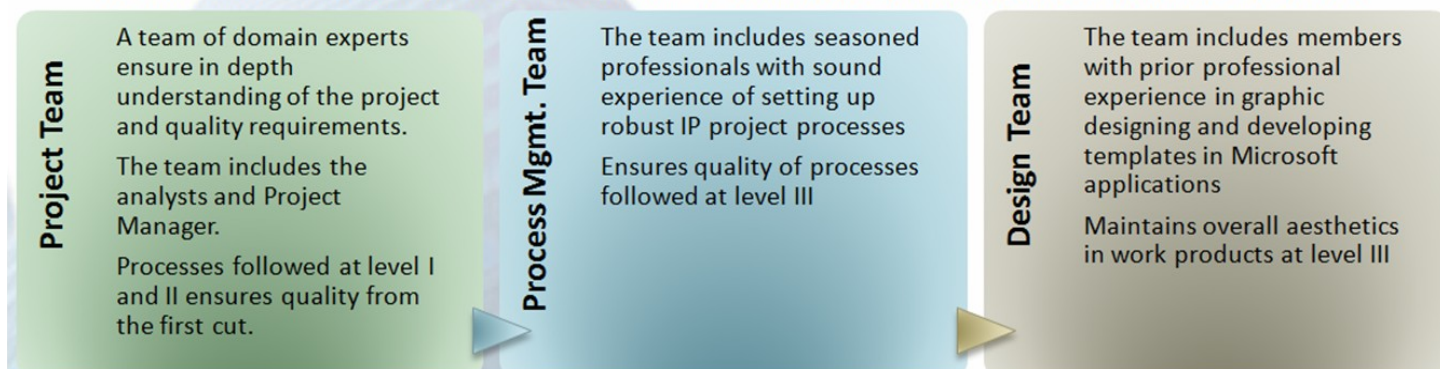

KAnalysis aims to become a leading global research and analytics firm with emphasis on quality in every communication with the client. We firmly believe that foundation of a successful organization lies in strong work ethics. At KAnalysis strong work ethics is maintained by ensuring highest level of confidentiality in every process, integrity in everything we do, and strictly adhering to communicated timelines.

KAnalysis Quality Management

KAnalysis follows a feedback based model termed as **Collaborative Delivery Model (CDM)**. This model utilizes client feedback on interim deliverables as a mechanism to ensure that the team and the client are on the same page. CDM is incorporated in all the projects executed at KAnalysis.

We follow a three level quality management process – Peer Review, Project Manager Review and Third Eye Review
